Press Report

Necessity is the mother of invention and students must develop strong problem-solving skills to the fullest extent

**Mr. Nagaraja Gargeshwari
Chairman, CII Mysuru**

"It is essential to systematically plan and find solutions to problems to achieve meaningful outcomes," stated Mr. Nagaraja Gargeshwari, Chairman of the Confederation of Indian Industry (CII), Mysuru Zone, and President and Director of Automotive Axles Ltd, Mysuru. He was speaking at the inauguration of the *Internship and Training Programmes to Empower UG Students for Future Success*, organized by JSS College of Arts, Commerce, and Science, Ooty Road, Mysuru as an IQAC initiative, in collaboration with the University of Mysore and the CII-Industry Institute Interaction and Higher Education (CII-III & HE Panel) of Mysuru Zone.

Emphasizing the importance of problem-solving skills, Mr. Nagaraja urged students to take initiative in addressing challenges efficiently, effectively and innovatively to become highly sought-after professionals in the job market. He also highlighted the significance of global exposure and stressed the necessity of internships in the USA to enhance employability in industries. Encouraging students to seize internship opportunities, he remarked that such experiences serve as vital stepping stones towards a successful career.

The Director, College Development Council of University of Mysore, and also the Professor of Chemistry, Dr. K. Mantelingu, applauded the efforts of JSS Institutions and the college for bringing elevated quality in academics and research. Dr. Mantelingu urged students to achieve success by setting clear goals and working systematically towards them. He emphasized that failures should be seen as stepping stones to success. Speaking on the fundamental components of success and employability, he highlighted the importance of effective communication skills, time management, and balancing *Shreya* (what is good) and *Preya* (what is pleasant) activities. He also stressed the need for setting *SMART* goals—Specific, Measurable, Achievable, Relevant, and Time-bound—while maintaining focus, self-belief, and the ability to work diligently both in ordinary and extraordinary ways. Prof. Mantelingu quoted that *80% of success depends on psychological attention and self-confidence*, with the remaining 20% relying on skills and their effective application. He encouraged students to put in dedicated efforts to achieve their aspirations and turn their dreams into reality.

The president of the function, the Chief Executive of the college, Prof. B. V. Sambashivaiah, elaborated on the evolution of skilling programs in India, tracing their origins back to the initiatives of the Ministry of Human Resource Development (MHRD) and the

University Grants Commission (UGC) in 2013. He highlighted the introduction of skill-based education through the National Skills Qualifications Framework (NSQF), starting from training at the 9th standard level, the Community College Scheme and the expansion of vocational programs from undergraduate to Ph.D. levels in 2015-16. Prof. Sambashivaiah emphasized the importance of internship activities as envisioned in the National Education Policy (NEP) 2020, drawing comparisons to global standards—where skill training holds a weightage of 50% in the USA, 75% in Germany and 90% in South Korea. He also outlined the University of Mysore's guidelines for conducting internship programmes, which include organizing expert talks and sessions featuring industrialists, entrepreneurs, and professional trainers. Advising students to actively engage in all these activities, he drew attention of students to acquire skills for enhancing employability and career readiness.

Dr. M. Dharma Prasad, CEO and Chief Scientist of Prosetta Bioconformatics Ltd. and Convener of the CII-III & HE Panel of Mysuru Zone, delivered a captivating keynote address on the topic "*Reference of Resource Persons in the Field.*" Emphasizing the importance of professional networking, Dr. Dharma Prasad strongly advised students to build a strong reference network through both online and offline platforms to enhance their visibility to recruiters. He highlighted that *70% of job vacancies are filled through references*, showing the need for students to proactively schedule their activities, plan strategically, prepare innovative ideas and showcase their results effectively to stand out to employers. He urged students to be highly competitive, disregarding their backgrounds and to connect with both familiar and unfamiliar professionals to expand career opportunities. Presenting employment statistics, he pointed out that *40% of graduates are not employable*, whereas the unemployment rate for *+2 students is only 2%*. He encouraged students to continuously update their learning outcomes and professional activities on platforms like LinkedIn to enhance communication with recruiters and strengthen their resumes. Dr. Dharma Prasad introduced the concept of *three levels of networking*: (1) peers and work-friends, (2) alumni and (3) mentors among academicians, industrialists and professional trainers. He emphasized that students should engage in meaningful knowledge-sharing rather than directly asking industry professionals for job opportunities. "*Learn, adopt skills and connect with established professionals to become truly employable,*" he concluded, inspiring students to take a structured approach toward career development.

The Principal Dr. M Prabhu, extended a warm welcome to all guests, dignitaries, and students. The IQAC coordinator Dr. N Rajendraprasad, compered and proposed vote of thanks. Ms. Adithi Hegde of BCom invocated.

More than 500 students of the college from various disciplines have participated in the programme.
