**Report of**  
**Skill development Programme and interaction of students with**  
**Resource persons**

A skill development program typically focuses on equipping students with practical skills essential for their chosen career paths. One of the pillars of organizational success is the skills of its students. Skill building is key to equipping students with what they need to perform at their best, now and in the future.

Students acquire and develop skills through learning and practice. It is the process by which an organization helps its students acquire skills needed to achieve its strategic objectives and gain a competitive advantage. This is accomplished by introducing skill-building activities, Inviting professionals from various industries to share insights and experiences, providing students with a broader perspective.

Effective skill development programs contribute to producing graduates who are not only academically proficient but also well-prepared for the demands of the professional world.
